

COMPANIES' SURVEY RESULTS: GREECE

A total of 23 companies participated in the survey carried out in the frame of the MULTITRACES project in Greece. These companies are located in the rural areas in 3 different Regions in Northern Greece, the Region of Eastern Macedonia & Thrace, the Region of Central Macedonia and the Region of Thessaly. The survey was based on a structured questionnaire with mostly closed-type of questions. The statistical results of our preliminary analysis are presented in the following sections.

1. COMPANY INFORMATION

1.1 SIZE OF THE COMPANY

Four size classes were used to describe the companies that took part in the survey in terms of their size, namely very small, small, medium and large. Table 1 includes the distribution of the companies to the different four size classes. Almost 83% of the companies were very small or small and only 4% were classified as large. This was expected as most of the companies based in the rural areas of Greece are small enterprises.

Table 1. Distribution of the companies participated in the MULTITRACES survey according to their size

COMPANY SIZE		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	VERY SMALL	14	60,9	60,9	60,9
	SMALL	5	21,7	21,7	82,6
	MEDIUM	3	13,0	13,0	95,7
	LARGE	1	4,3	4,3	100,0
	Total	23	100,0	100,0	

Figure 1. Percent distribution of the companies participating in the MULTITRACES project in terms of their size

Figure 2. Dispersion of the company data responses in terms of the company size

1.2 Company year of foundation

About 60% of the companies that participated in the survey were founded 20 or more years ago, that is they are well established in the market and almost 14% were founded during the past 10 years.

Table 2. Distribution of companies by their year of foundation

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	1920-1930	1	4,3	4,5	4,5
	1961-1970	1	4,3	4,5	9,1
	1971-1980	2	8,7	9,1	18,2
	1981-1990	4	17,4	18,2	36,4

	Total	23	100,0		

Figure 3. Percent distribution of the companies participated in the MULTITRACES survey according to their year of foundation

Figure 4. Dispersion of the company data responses in terms of the company year of foundation

1.3 Company involvement in research projects over the past 5 years

The majority of the companies (70%) that participated in the MULTITRACES survey were not involved in any research project over the past 5 years.

Table 3. Distribution of the companies participated in the MULTITRACES survey according to their involvement in research projects over the past 5 years

	Frequency	Percent	Valid Percent	Cumulative Percent
Valid NO	16	69,6	69,6	69,6
YES	7	30,4	30,4	100,0

3. KNOWLEDGE OF CIRCULAR ECONOMY IMPLEMENTATION IN RURAL AREAS

3.1 Time of first hearing about Circular Economy

Table 5. Distribution of the companies participating in the MULTITRACES survey according to time of first hearing about Circular Economy

	Frequency	Percent	Valid Percent	Cumulative Percent
Valid 5 OR MORE YEARS AGO	12	52,2	52,2	52,2
2 TO 5 YEARS AGO	8	34,8	34,8	87,0
LAST YEAR	3	13,0	13,0	100,0
Total	23	100,0	100,0	

Figure 9. Percent distribution of the companies participated in the MULTITRACES survey according to the time of first hearing about Circular Economy

Figure 10. Dispersion of the company data responses in terms of the time of first hearing about Circular Economy

3.2. Circular Economy actions implemented by the companies over the past 5 years

Most of the companies (90% of responses) stated among the circular economy actions that their company implemented over the past 5 years the minimization of waste by recycling or reusing waste or selling it to another company. The least circular economy implemented action by the companies participating in the MULTITRACES survey was the Life Cycle Assessment. Also worth to note was that less than 20% of the companies stated that they used renewable energy sources.
